PART I: THE ACTUARY AND THE SOCIAL SECURITY	
CHAPTER 1: FINANCING SOCIAL SECURITY	
I.1.1 An Introduction to social security	4
I.1.2 Financial organisation of social security	5
I.1.3 Outlines of the financial systems in social security	6
I.1.4 Financial systems in short term branches: the actuarial tools	10
I.1.5 Financial systems in long term branches: the actuarial tools	12
I.1.6 Benefits of public pension schemes	16
I.1.7 Arguments related to funding	16
I.1.8 Some World Bank views about pension benefits	18
CHAPTER 2: ACTUARIAL VALUATIONS	
I.2.1 The actuarial task	20
I.2.2 Organisation of the actuarial exercise	21
Annex 1 - Some accounting reminds	24
Annex 2 - Social Security Statistics	26
Annex 3 - Case study	29
PART II: PENSIONS	
Chapter 1: Foundation of the pension technique	
II.1.1 The main framework	37
II.1.2 The typical pension framework	38
II.1.3 Re-drawing the framework	43
Chapter 2: Multiple Decrement Models	
II.2.1 Theoretical considerations	44
II.2.2 The multiple decrement models: applications	47
II.2.3 Some statistical data and a theoretical formula	49
II.2.4 More causes of invalidity	51
II.2.5 Selected mortality tables for invalidity	52
II.2.6 An example of multiple decrement tables for invalidity and selected mortality tables: the case of AIDS	52
Annex 1- A simple model for considering AIDS invalidity	54
Chapter 3: Pension Schemes: Demographic and Financial assumptions for actuarial valuation	
II.3.1 Actuarial valuation and Projection Model	56
II.3.2 Demographic assumptions	57
II.3.3 Input Data	58
II.3.4 General assumptions for model construction	59
II.3.5 Output figures	61

PART III: EMPLOYMENT INJURY

III.1	Introduction	62
III.2	The benefit package	63
III.3	Financial organisation of the branch	64
III.4	Involvement of the actuary	64
III.5	Uniform rate assessment	68
III.6	Differential rates	70
	Annex 1 – The credibility rates	72

PART IV: HEALTH CARE

IV.1	Social protection in health care	78
IV.2	Benefit package and providers' payments	79
IV.3	Contributions	80
IV.4	Administration and Information system	81
IV.5	The financial equilibrium	82
IV.6	Actuarial valuation in health schemes	83
IV.7	The expenditure model	84
IV.8	Actuarial valuations by using morbidity tables	85
IV.9	Actuarial valuations in the absence of morbidity tables	86
	Annex 1 Financing health care	87
